

Imperial College
London

In partnership with

Bridge Community – We need your help!

English Bridge Education & Development in partnership with Imperial College London, are commissioning an fMRI study to investigate the cognitive abilities of bridge players.

Purpose

To measure the memory and cognitive abilities of bridge players, and compare these to those of non-bridge players.

We are looking to recruit both bridge players and non players to act as controls

Can you help?

If you can answer YES to the questions below, we'd love to hear from you.

1. Are you female?
2. Are you aged between 60-80?
3. Are you right handed?

We need both people who play bridge and those who have never played so please encourage friends and family to contact us too.

Detail of requirement

Two, 4 hour visits to Imperial College London (Hammersmith Campus).
One Magnetic Resonance Imaging (MRI) scan of your head.

Important: Unfortunately, you will not be able to take part in this study if you are claustrophobic or have any metallic implants in your body.

For full details, or to find out more, please contact:

Dr Caroline Small.
